About me

I am a front-end software developer currently working at a German Language School. I have worked on distributed, remote teams. My key skills are ReactJS, NodeJs, Flutter, Dart, AWS, Firebase.

I am also currently working on a personal project: a mobile application designed to help Language Learners acquire vocabulary easily by watching Youtube videos. The application is being developed on flutter with a Nodejs/Typescript serverless backend.

I love language learning and PKM (Personal Knowledge Management). Also a Flutter dev.

Experience

Software Developer, Bauer DeutschAkademie
2021 – Present | Cuenca, Ecuador

- Implemented software solutions for managing certificates of course completions (Reactjs, Tailwind, Vercel)
